

# NatuRose

Natural Astaxanthin <sup>®</sup>

*Naturally good, naturally better!*

*NatuRose is a totally natural product*

*NatuRose is an essential ingredient of Breeders Blend and it is also available in its natural form. But what makes it so important? Quite simply, it is chock full of astaxanthin, nature's alternative to synthetic colour. By feeding your fish NatuRose you will notice (very quickly) a remarkable difference in their appearance.*

*NatuRose is a totally natural product - it is grown, not manufactured in a science laboratory, so there are no harmful hormones or synthetic colouring agents. The vitamins, minerals and antioxidants it contains will contribute to an improvement in the overall health of your fish.*

*Breeders Blend has just the right mix of NatuRose for everyday needs but breeders can purchase it in its purest form to supplement their own mixes. It has excellent adherence to semi-moist food and very little wash off when feeding. Once opened NatuRose is best kept refrigerated or frozen. Astaxanthin, like all carotenoids, is sensitive to light, heat and oxygen so steps should be taken to minimise exposure to these elements.*

## *NatuRose will benefit all fish!*

*NatuRose will benefit all fish but especially Tropicals, Koi, Discus and the Cichlid family.*

## *The Technical Stuff*

*NatuRose - Typical Analysis  
Natural Algal Astaxanthin Powder (per 100 grams)*
